

My husband and I live in a rural area of Wyoming and have few radio stations to listen to while traveling to and from Cheyenne where my husband works. K-LOVE is one of the few stations he can listen to much of the trip. This station and also Pilgrim radio which we listen to here in Worland on FM translator would be missed because they provide musical entertainment, weather, news, and many other programs that provide guidance and encouragement for our family and friends. We do not have much else to listen to. Please do not expand the LPFM to take priority over current FM translator service. We would miss the stations that we have.
